BACHELOR OF SCIENCE  
COMPLETION PROGRAM

.....for.....

**REGISTERED  
NURSES**

# ABOUT *the* Program

Would you like to continue your education? Are you interested in seeking a **management position** in the future? Are you interested in seeking **employment** in a community setting (home health nursing, public health nursing or school nursing)?

Are you interested in **advanced practice** in nursing (nurse practitioner, nurse anesthetist, nurse midwife, or nurse educator)? If you answered **yes** to any of the above questions, you need to consider seeking a **Bachelor of Science in Nursing (BSN)** degree in order to meet admission requirements for graduate study in nursing.

Coastal Carolina University has a nursing program that is three semesters in length and all the classes are held one day a week on Saturdays. This student-friendly program is designed for working nurses.

The nursing program at Coastal Carolina University builds on the foundation courses in associate degree and diploma programs and the liberal arts core curriculum. Admission to the program requires:

- Active South Carolina, North Carolina or Georgia nursing license
- Graduation from an accredited associate or diploma nursing program with a grade of "C" or better in all courses
- Completion of Core Curriculum (see CCU course catalog)
- Current CPR certification
- Clean SLED check
- All immunizations up-to-date

Students must submit an application and official transcripts to the Office of Admissions along with application fees. Coastal Carolina University will award 1 to 35 credit hours for nursing hours completed in an associate degree or diploma program.
