When complete, the four new buildings will add more Convocation Center and three major academic buildings. The building campaign includes the Student Services building, which will be the most ambitious construction program in its history. This new building will provide a natural laboratory for extensive study in marine science. The building will be located on 1,105 acres of pristine barrier island on the Atlantic coast, near the Waccamaw Center for Higher Education in Litchfield and the coastal campus in Conway. The building will include the Coastal Science Center and the Burroughs Wellcome Fund for the Advancement of Science Education, which will be the largest laboratory of its kind in the country.

The University of Coastal Carolina began granting four-year degrees in 1974.
