The Tourism Economy Study: CCU Lodging Update, January 16, 2014

Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of Jan. 5-11, 2014, indicate that the midweek occupancy rate averaged 18.4 percent, up 2.3 occupancy points or 14.2 percent compared with the equivalent week of 2013. During the Friday-Saturday night period, the occupancy rate averaged 23.9 percent, down 3.8 occupancy points or 13.7 percent compared to the equivalent weekend of last year. The average daily rate was up down 2.2 percent during the midweek period and down 9.9 percent during the weekend period compared with last year. Consequently, occupancy for HC-HCs for the week overall was up 0.6 occupancy point or 3 percent, but revenue per available room (RevPAR) was down 3.8 percent compared to the equivalent week of 2013.

Vacation Rental Properties

Based on the Brittain Center’s observations of random samples of Internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (338 of the 3,135 units) for which complete data are publicly available, during the nights of Jan 4-10, 2014, 27.9 percent were reserved or blocked from nightly rentals. The percentage of VRPs reserved in Horry and Georgetown counties combined was down 8.5 occupancy points or 23.4 percent compared with the equivalent period of last year. For the nights of Jan.11-17, 29.9 percent of the VRPs were reserved or blocked from reservation. The level of reservations was down 9 occupancy points or 23.2 percent compared with the equivalent week of 2013.

Six-Week Average Performance

During the nights of Dec. 1, 2013-Jan. 11, 2014, 25 percent of the lodging properties in the Brittain Center’s voluntary sample of hotel, condo-hotel and campsite properties located along the Grand Strand were occupied, which was up 3.6 occupancy points or 17 percent compared with the equivalent weeks last year. The average daily rate for these properties was up 1.5 percent compared with the equivalent weeks last year. Consequently, RevPAR was up 18.8 percent compared with the equivalent period last year. During the same period, 39.7 percent of the vacation rental property bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from nightly rentals, which was up 0.6 occupancy point or 1.6 percent compared with the equivalent weeks of last year. Advertised prices for this segment were up 2.3 percent compared with last year, which would lead to an increase in revenue per available bedroom of 3.9 percent.

Forecast and Analysis

At the time of this writing, the forecast from weather.com for the weekend of Jan. 18-19 called for 10 and 0 percent chance of precipitation, respectively. The Brittain Center forecasts that average occupancy for its sample of hotel, condo-hotel and campsite properties may be near or above 40 percent during the nights of Jan. 17-18. Based on this week’s observations by Center researchers of 338 websites of vacation rental properties available to rent in Horry or Georgetown counties for the week of Jan. 18-24, 32.3 percent are reserved. VRP reservations in Horry and Georgetown counties for that week are down 6.8 occupancy points or 17.5 percent compared with the same period of 2013. VRP reservations forecasts for the weeks of Feb. 25-30, 2014, and Feb. 8-14 can be found in the CCU Lodging Update for Jan. 9, 2013.

Additional Research Notes

The Brittain Center’s preliminary sample of 26 hotel, condo-hotel and campground properties reporting for the week of Jan. 5-11, 2014, consisted of 12 hotels (all but five are oceanfront/view, and five are brand affiliated), 13 condo-hotels (all are oceanfront/view and one brand affiliated) and one campground resort property. The results for the current moving six-week period are based on an average sample size of 8,951 units per week average.
