The Tourism Economy Study: CCU Lodging Update, March 6, 2014

Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of Feb. 23-March 1, 2014, indicate that the midweek occupancy rate averaged 33.9 percent, down 0.9 occupancy point, or 2.7 percent, compared with the equivalent week of 2013. During the Friday-Saturday night period, the occupancy rate averaged 61.3 percent, up 7.8 occupancy points, or 14.7 percent, compared to last year. The average daily rate was down 7.7 percent during the midweek period and up 18 percent during the weekend period compared with last year. Consequently, HC-HC occupancy for the week overall was up 1.3 occupancy points, or 3.2 percent, and revenue per available room (RevPAR) was up 8.5 percent compared with the equivalent week of 2013.

Vacation Rental Properties

Based on the Brittain Center’s observations of random samples of Internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (338 of the 3,135 units) for which complete data are publicly available, 47.3 percent were reserved or blocked from nightly rentals during the nights of Feb. 22-28. The percentage of VRPs reserved in Horry and Georgetown counties combined was down 2.3 occupancy points, or 4.6 percent, compared with the equivalent period last year. For the nights of March 1-7, 46.1 percent of the VRPs were reserved or blocked from reservation. The level of reservations was down 7.7 occupancy points, or 14.3 percent, compared with the equivalent week of 2013.

Six-Week Average Performance

During the nights of Jan. 19-March 1, 34.1 percent of the lodging properties in the Brittain Center’s voluntary sample of hotel, condo-hotel and campsite properties located along the Grand Strand were occupied, which was up 0.9 occupancy point, or 2.8 percent, compared with the equivalent weeks last year. The average daily rate for these properties was down 1.6 percent compared with the equivalent weeks last year. Consequently, RevPAR was up 1.1 percent compared with the equivalent period last year. During the same period, 41.8 percent of the vacation rental property bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from nightly rentals, down 3.8 occupancy points, or 8.3 percent, compared with the equivalent weeks last year. Advertised prices for this segment were up 4.8 percent compared with last year, leading to a decrease in revenue per available bedroom of 3.9 percent.

**Forecast and Analysis**

At the time of this writing, the forecast from weather.com for the weekend of March 8-9 calls for a 0 and 20 percent chance of precipitation, respectively. The Brittain Center predicts that average occupancy for its sample of HC-HC properties may be near or above 65 percent during the nights of March 7-8, or within 3 occupancy points of the level last year at this time. Based on this week’s observations by Center researchers of 338 websites of vacation rental properties available to rent in Horry and Georgetown counties for the week of March 8-14, 48.5 percent are reserved. VRP reservations in Horry and Georgetown counties for that week are down 9.3 occupancy points, or 16.1 percent, compared with the same period of 2013.

**Additional Research Notes**

The Brittain Center’s preliminary sample of HC-HC properties reporting for the week of Feb. 23–March 1, consisted of 13 hotels (all but five are oceanfront/view, and five are brand affiliated), 15 condo-hotels (all are oceanfront/view and one brand affiliated), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 9,467 units per week average.
