The Tourism Economy Study: CCU Lodging Update, June 12, 2014

Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of June 1-7, 2014, indicate that the midweek occupancy rate averaged 62.6 percent, down 2.5 occupancy points or 3.8 percent compared with the equivalent week of 2013. During the Friday-Saturday night period, the occupancy rate averaged 80.9 percent, up 2.5 occupancy points or 3.1 percent compared to the equivalent weekend last year. The average daily rate was down 2.1 percent during the midweek period, but up 1.9 percent during the weekend period, compared with last year. Consequently, HC-HC occupancy for the week overall was down 1.2 occupancy points or 1.8 percent, and revenue per available room (RevPAR) was down 2.2 percent compared with the equivalent week of 2013.

VRPs

Based on the Brittain Center’s observations of random samples of Internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (338 of the 3,135 units) for which complete data are publicly available, 67.1 percent were reserved or blocked from nightly rentals during the nights of May 31-June 6. The percentage of VRPs reserved in Horry and Georgetown counties combined was up 13.3 occupancy points or 24.7 percent compared with the equivalent period last year. For the nights of June 7-13, 77.6 percent of the VRPs were reserved or blocked from reservation. The level of reservations was up 3.6 occupancy points or 4.9 percent compared with the equivalent week of 2013.

Six-Week Average Performance

During the nights of April 27-June 7, 59.9 percent of the lodging properties in the Brittain Center’s voluntary sample of HC-HC properties located along the Grand Strand were occupied, which was up 3.9 occupancy points or 6.9 percent compared with the equivalent weeks last year. The average daily rate for these properties was up 0.7 percent compared with the equivalent weeks of 2013. Consequently, RevPAR was up 7.7 percent compared with the equivalent period of 2013. During the same period this year, 72.8 percent of the VRP bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from nightly rentals, up 15.3 occupancy points or 26.5 percent compared with the equivalent weeks last year. Advertised prices for this segment were down 6.4 percent compared with last year, leading to an increase in revenue per available bedroom of 19 percent.

Forecast and Analysis

At the time of this writing, the forecast from weather.com for the weekend of June 14-15 calls for 40 and 30 percent chance of precipitation, respectively, with a high of 86 degrees. The Brittain Center predicts that average occupancy for its sample of HC-HC properties may be near or above 90 percent during the nights of June 13-14, or within 2 occupancy points of the equivalent weekend of 2013. Based on this week’s observations by Center researchers of 338 websites of VRPs available to rent in Horry and Georgetown counties, 81.4 percent are reserved for the week of June 14-20. VRP reservations in Horry and Georgetown counties for that week are down 0.4 occupancy point or 0.5 percent compared with the same period of 2013.

Additional Research Notes

The Brittain Center’s preliminary sample of 29 HC-HC properties reporting for the week of June 1-7 consisted of 13 hotels (all but five are oceanfront/view, and five are brand affiliated), 15 condo-hotels (all are oceanfront/view and one brand affiliated), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 9,635 units per week average.
