The Tourism Economy Study: CCU Lodging Update, November 27, 2013

Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of Nov. 17-23 indicate that the midweek occupancy rate averaged 23.1 percent, down 9.2 occupancy points or 28.4 percent compared with the equivalent week of 2012, which last year included Thanksgiving. During the Friday-Saturday night period, the occupancy rate averaged 25 percent, down 25.8 occupancy points or 50.8 percent compared to the equivalent weekend of 2012, which last year included black Friday. The average daily rate was up 1.5 percent during the midweek period but down 16.8 percent during the weekend period compared with last year. Consequently, occupancy for HC-HCs for the week overall was down 14 occupancy points or 37.3 percent, but revenue per available room (RevPAR) was down 41.1 percent compared to the equivalent week of 2012, which last year included the Thanksgiving and black Friday period.

Vacation Rental Properties

Based on the Brittain Center’s observations of random samples of Internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (338 of the 3,135 units) for which complete data are publicly available, during the nights of Nov. 16-22, 2013, 31.9 percent were reserved or blocked from nightly rentals. The percentage of VRPs reserved in Horry and Georgetown counties combined was down 33.3 occupancy points or 51.1 percent compared with the equivalent period of 2012, which in that year included Thanksgiving and black Friday. For the nights of Nov. 23-29, 2013, 60.2 percent of the VRPs were reserved or blocked from reservation. The level of reservations was up 21.6 occupancy points or 56.1 percent compared with the equivalent week of 2012.

Six-Week Average Performance

During the nights of Oct. 13-Nov.23, 2013, 38.2 percent of the lodging properties in the Brittain Center’s voluntary sample of hotel, condo-hotel and campsite properties located along the Grand Strand were occupied, which was up 1.5 occupancy points or 4.1 percent compared with the equivalent weeks of 2012. The average daily rate for these properties was up 0.3 percent compared with the equivalent weeks last year. Consequently, RevPAR was up 4.4 percent compared with the equivalent period last year. During the same period, 40.2 percent of the vacation rental property bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from nightly rentals, which was down 11 occupancy points or 21.5 percent compared with the equivalent weeks of last year. Advertised prices for this segment were up 4 percent compared with last year, which would lead to a decrease in revenue per available bedroom (RevPAB) of 18.3 percent.

Forecast and Analysis

At the time of this writing, the forecast from weather.com for the weekend of Nov. 30-Dec. 1 called for 0 and 30 percent chance of precipitation, respectively. The Brittain Center forecasts that average occupancy for its sample of hotel, condo-hotel and campsite properties may be near 50 percent during the nights of Nov. 29-30, 2013. Based on this week’s observations by Center researchers of 338 websites of vacation rental properties available to rent in Horry or Georgetown counties for the week of Nov. 30-Dec. 6, 35 percent are reserved. VRP reservations in Horry and Georgetown counties for that week are up 4.3 occupancy points or 13.9 percent compared with the same period of 2012.

Additional Research Notes

The Brittain Center’s preliminary sample of 30 hotel, condo-hotel and campground properties reporting for the week of Nov. 17-23 consisted of 13 hotels (all but five are oceanfront/view, and five are brand affiliated), 16 condo-hotels (all are oceanfront/view and one brand affiliated) and one campground resort property. The results for the current moving six-week period are based on an average sample size of 10,099 units per week average.
