The Sweetest Swing in Baseball

by Rebecca Gilman

Edwards Theater, Edwards College of Humanities and Fine Arts Building (117)

7:30 p.m.

Rebecca Gilman's poignant, dark-comedy, which premiered in London in 2004 introduces Dana Fielding, an artist who is struggling with life and "losing it" along the way. Her latest exhibit is a disaster, her boyfriend is leaving and her paranoia is out of control. When she lands in a mental hospital, it's a chance to rebuild her sanity—until she learns that her insurance will only pay for a ten-day stay. As she finds comfort and stability in the day-to-day routine of being a patient, she begins to take on the role of famed baseball player Darryl Strawberry in an attempt to convince her doctors of her insanity. Little does she realize that taking on this alter ego forces her to unearth the issues that come from dealing with the price of fame and one's true identity.

Waties Island Tour

Waties Island, North Myrtle Beach

9 a.m. to 1 p.m.

Tours leave on the half hour from CCU's Anne Tilghman Boyce Coastal Reserve.

- * Registration required.
- * Optional Event: \$10 per person.
- * Directions provided at registration.

In 1992, 1,049 acres on Waties Island and the adjoining uplands of Tilghman Point were donated to the Coastal Educational Foundation. The gift has been protected with a perpetual conservation easement through the Nature Conservancy of South Carolina. It was the wish of the late Anne Tilghman Boyce that the property she left to a charitable trust be maintained "in essentially a wilderness state." Through her bequest, the support of her surviving children, and a large cash gift from her late sister-in-law, Kitty Lou Tilghman, the University has gained a magnificent addition to the facilities it can offer to students and faculty for education and research.

The Waties property is an outstanding example of an undeveloped complex of ocean frontage, fresh and saltwater marshes, tidal creeks and upland woods. Surrounded by a rapidly urbanizing environment, Waties Island is becoming increasingly significant for research, monitoring and education about the natural coastal habitat. The island is a very dynamic place. Since 1989, the South Carolina coastline has been affected by seven hurricanes, as well as several other tropical storms and "nor'easters." As a result, change is the rule rather than the exception. This makes Waties Island an excellent outdoor laboratory in which to study natural coastal processes. Take a breathtaking tour and visit with our faculty and students who are actively involved in research on the island.
