For all Psychology majors, the following 4 courses are required and must be completed in sequential order. Courses cannot be taken at the same time. If you do not earn a C or better in each of these courses, you must retake the course and earn a grade of C or better before moving onto the next course in the sequence.

1. MATH 130/130i (3 credits), College Algebra, placement into MATH 131 or higher level MATH class, or completion of higher level MATH class. To be taken during the Freshman year.
   A grade of C or better in MATH 130, placement into MATH 131 or higher level MATH, or completion of higher level MATH is required for PSYC 225/L and CBAD 291.

2. PSYC 225/L (4 credits), Psychology Statistics and Lab (or STAT 201/L or CBAD 291). To be taken during the Freshmen/Sophomore year.
   A grade of C or better in PSYC 225/L is required for PSYC 226/L, PSYC 480/L, and PSYC 483/L.

3. PSYC 226/L (4 credits), Research Methods in Psychology and Lab. To be taken during the Sophomore/Junior year.
   A grade of C or better in PSYC 226/L is required for PSYC 497/L.

4. PSYC 497/L (4 credits), Applied Research in Psychology and Lab. To be taken during the Junior/Senior year.
   A grade of C or better in PSYC 497/L is required for the major.
   Due to the intense nature of research, this course is only taught in FA and SP semesters; not in the summer. Research takes time and the research participant pool is only available during FA and SP.

I understand these 4 major requirements will take 4 semesters to complete, that PSYC 497 will NOT be offered in the summer, and summer offerings of these other required courses may vary. Failure to plan accordingly and failure to earn Cs or better in any of these courses may result in delayed graduation. In addition, other courses are required for the major, as explained in the course catalog.
