CCU Coastal Marine and Wetland Studies
M.S. Theses
Coastal Carolina University

2006. Klein-Majors, S. Correlations between the distributions of the Atlantic stingray (*Dasyatis sabina*) and the southern stingray (*Dasyatis sabina*) to salinity profiles in Winyah Bay, South Carolina. 41 pp.

2006. Laliberte, L. Plant distribution and diversity across the ecotone between Carolina bays and pine savanna on the coastal plain of South Carolina. 56 pp.

2008. Trott, E. Competition between *Littoraria irrurata* (Say) and *Melampus bidentatus* (Say) in the high marsh on Waites Island, South Carolina. 44 pp.

2009. Shappell, L. Examining the ecological effects of prescribed fire on the habitat structure of isolated wetlands and longleaf pine uplands at Sandy Island, South Carolina. 73 pp.
2009. Stevens, J. Relative abundance of filamentous fungi and yeast species in sands of low, medium and high-used beaches of Horry County, SC. 44 pp.
2010. Schreer, J. Seasonal residency and movement patterns of blacktip sharks, Carcharhinus limtabus, in a South Carolina estuary. 54 pp.
2010. Rotella, A. Growth and biomass of water hyacinth in a tidal blackwater river system, SC.
2010. Fierro, J. Sediment provenance of a shore oblique sand body, Long Bay, SC.58 pp
2010. Fox, A. Interactions between birds and strand-feeding dolphins (Tursiops truncatus) in a South Carolina salt marsh. 96 pp
2011. Ruppel, W. M. Relationship between macroinvertebrate assemblage structure and ecosystem function in two coastal plain blackwater streams.

2011. Canton, L. Factors affecting the selection and consumption of oyster reef prey (*Crassostrea virginica, Geukensia demissa*) by mud crabs (*Panopeus herbstii*).
