05 50 00 – Metal Fabrications

01 Downspout Boots

Designers shall consider the use of protective downspout boots on projects with exposed gutters and downspouts to protect the drainage systems from landscaping maintenance and pedestrian abuse. For rectangular downspouts use model #DS4 by McKinley Iron Works or similar equal product.

02 Access Ladders

Where access ladders are provided, the Architect shall review access ladder design with the CCU Project Manager to ensure adequate access and usefulness of the proposed ladder for CCU Maintenance staff.
