

## **Use of Technology**

I have attached the statement below because the online system is not allowing this statement to be viewed on the final form.

The use of technology in our music education classrooms is set up to mirror what occurs in the Horry County Public Schools. Our course delivery will apply the use of these technologies to prepare our music education students for their future careers. We currently possess what technology we need to begin the program. Cost projections in the proposal are based on future technological needs to keep pace with Horry County Public Schools, required instruments for instrumental techniques classes, and classroom instruments for methods classes.
