Discover: Finding Books

Discover allows you to search multiple databases at once to find books, articles, videos, and more. To find books, type your keywords in the search box at the top of the page and then press enter.

Note that, if you’re off campus, you’ll need to log into your Coastal account by clicking the login link at the top of the results page.
To refine your results, choose from the options at the left, including publication date, or scroll down to source types where you can select Books (which is a combination of print and electronic books) or just eBooks.

You can also choose the “advanced search” option and select a field from the dropdown menu.

To find a print book, you can view the call number beneath the citation information.
Click the title of the book or the “Retrieve Catalog Item” link to find out if the book is currently available or if it’s checked out, and note that you can also send the call number to yourself via text message. To read an electronic book, click the full-text link or the “Retrieve Catalog Item” link.
