PASCAL: Requesting Books from Other Libraries

PASCAL is a partnership of South Carolina college and university libraries. These libraries have book borrowing privileges with each other, so before placing a book request through Interlibrary Loan, you should first see if it’s available through PASCAL. To do so, click the “Library Catalog” link beneath the Discover search box and search for the book that you’re looking for.

Review the results to confirm that it’s not available here at Kimbel Library and if not, then click the PASCAL link at the top right side of the page.
Browse the results to find the correct book, and then either click “request,” or click the title to make sure it’s available.

Choose Coastal Carolina University from the drop-down menu, enter your name and Student ID #, and then press “submit.” You will be notified via email when your book is ready for pickup at Kimbel Library’s circulation desk.
