Coastal Carolina University’s CINO Success Plans are designed to support and educate students through their decision-making regarding substance use. Individual plans vary based on past disciplinary record, the severity of the behavior, and/or the impact upon the community. The University encourages students to engage in healthy decision-making and to report inappropriate behavior that is in violation of our Code of Student Conduct. Any student issued a CINO Success Plan will be assigned at least one outcome from each of the following categories; there may be fees associated with certain University services.
