Women in STEM Fellowship

Fellowship Goals

♦ Create a mentorship program in which female undergraduate and graduate students will offer advice and support to new female STEM majors;

♦ Bring together female STEM students in monthly meetings that can serve as consciousness-raising sessions and community-building programs;

♦ Support undergraduate research, conference travel, and memberships with pertinent professional organizations, such as the Association for Women in Math and Women in Computing;

♦ Bring prominent female speakers in STEM fields to CCU to give campus-wide lectures and workshops on their experiences;

♦ Select students to be CCU ambassadors who will reach out to younger female students in elementary and middle schools in the area to encourage interest in the STEM fields;

♦ Conduct workshops on life-long learning skills to support success in students’ graduate and professional endeavors, such as graduate school application and grant writing techniques.

Mentors

Departmental Mentors

• Ina Seethaler
  Women’s & Gender Studies Program

• Jean French
  Dept. of Computing Sciences

• Gabriela Pérez-Alvarado
  Dept. of Chemistry
