On April 19, 2018, the Office of Human Resources and Equal Opportunity (HREO) notified the campus community about an upgrade to the current applicant tracking system, PeopleAdmin. This ambitious project will bring about many positive changes in the employment process at Coastal Carolina University.

The upgraded system will support several strategic objectives, including 3.1.2 (#4), 3.1.2 (#9) and 3.3.4. Improvements in the upgrade include:

- reducing the number of signatures required to initiate the search process and complete the hiring process;
- allowing electronic administrative approvals;
- decreasing the length of time the processes take;
- establishing a chain of custody associated with the tracking of transactions pending; and
- lessening the number of paper transactions.

While timelines are always subject to change, HREO anticipates a go-live date the last week of June 2018.

HREO will share additional information during the coming weeks regarding the transition to the upgraded and enhanced system. The method for these communications will include emails, links on the HREO webpage as well as providing training for those employees affected by these changes.
