Supervisors:

As previously announced, HREO has been involved in a year-long project to upgrade the applicant tracking and talent management system, PeopleAdmin (PA). Part of this upgrade will involve changes to how staff evaluations (EPMS) are completed in the new version of PA.

Like many of the other campus operations, the timeline for implementation of these changes were affected by Hurricane Florence. HREO anticipates going live with the new EPMS evaluation system on or about October 10, 2018. It is recognized that supervisors may need additional time to complete universal reviews this year, given the recent circumstances. Although the universal review evaluation period will remain the same, the deadline to complete the evaluations in PeopleAdmin will be extended until November 8, 2018.

Information on accessing the EPMS evaluation system and instructions will be provided in the near future.
