Mission and Scope

The Journal of European and American Intelligence Studies (JEAIS) – former Journal of Mediterranean and Balkan Intelligence (JMBI) –, is published by the Research Institute for European and American Studies (RIEAS). The Journal is an international academic-led scholarly publication that focuses on the field of intelligence and related areas of study and practice - such as (counter-)terrorism, homeland and international security, geopolitics, international relations. Its rationale is driven by the global society we live in today, where it is important more than ever to communicate and work together to solve our common problems. Thus, it aims at promoting an international dialogue between diverse perspectives and experiences, based on original research on the broader European and American practice and study of intelligence.

The Journal of European and American Intelligence Studies (JEAIS) is an all-inclusive academic platform that allows junior and senior scholars and practitioners from both the public and private sectors, to share their knowledge, ideas and approach to intelligence studies. By crafting each journal issue through a rigorous and highly selective screening process of potential contributors and an exhaustive review process, the JEAIS mission is three-fold: to provide an equal opportunity for academics and practitioners of intelligence to discuss and challenge ideas, to address existent knowledge gaps by creating new knowledge, and to shape future new debates in intelligence beyond traditional communities of research.
