ALLERGY INJECTIONS: GETTING STARTED AT CCU STUDENT HEALTH

In order to begin receiving your allergy injections at the health center, the following items must be received by student health:

- The completed allergy packet containing the signed and completed physician information/request form (completed by physician), and the Allergy Injection Intake and Consent form (completed by you), giving permission for CCU Student Health to administer your allergy injections.

- Your allergy extract(s) appropriately labeled with your name, DOB, extract contents, and outdate of extract. (This may be mailed directly to SHS by the physician or brought to SHS by you)

- Ongoing allergy injection log showing most recently administered injections and any reactions which may have occurred. This also should allow for continued documentation of injections given at SHS. This MUST accompany the extract(s).

- Specific dosage instructions and injection intervals.

- Dosage adjustment for missed/late injections.

THE STUDENT MUST:

- Schedule an intake appointment with the allergy nurse at student health (843-349-6543). You may bring your allergy extracts and completed paperwork at this time if not being sent by the physician. This appointment will take 20-30 minutes to complete. Injections usually are not given during this visit to allow for record review by the nurse and to resolve any need for further records.

Revised. 6/17, 6/18
