Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of Aug. 21-27, 2016, indicate that the midweek occupancy rate averaged 68.1 percent, up 18.2 occupancy points or 36.5 percent compared to the equivalent week of 2015. During the Friday-Saturday night period, the occupancy rate averaged up 85.4 percent, up 14.5 occupancy points or 20.4 percent compared to the equivalent weekend last year. The average daily rate (ADR) was up 4.7 percent during the midweek period and up 13.3 percent during the weekend compared with last year. Consequently, HC-HC occupancy for the week overall was up 17.1 occupancy points or 30.6 percent, and revenue per available room (RevPAR) was up 40.3 percent compared with the equivalent week of 2015.

VRPs

Based on the Brittain Center’s observations of random samples of Internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (318 of the 3,135 units) for which complete data are publicly available, 81 percent were reserved or blocked from nightly rentals during the nights of Aug. 20-26, 2016. The percentage of VRPs reserved in Horry and Georgetown counties combined was up 21 occupancy points or 37 percent compared with the equivalent week of 2015. For the nights of Aug. 27-Sept. 2, 2016, 64.3 percent of the VRPs were reserved or blocked from reservation. The level of reservations was up 6.2 occupancy points or 10.8 percent compared with the equivalent week of 2015.

Six-Week Average Performance

During the nights of July 17-Aug. 27, 2016, 84.9 percent of the lodging properties in the Brittain Center’s voluntary sample of HC-HC properties located along the Grand Strand were occupied, which was up 4.1 occupancy points or 5 percent compared with the equivalent weeks of 2015. The average daily rate for these properties was up 4.1 percent compared with the equivalent weeks last year, driving average RevPAR up 9.3 percent compared with the equivalent period last year. During the same period in 2016, 88.3 percent of the VRP bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from nightly rentals, up 4.3 occupancy points or 5.1 percent compared with the equivalent weeks last year. Advertised prices for this segment were up 4.3 percent compared with the equivalent weeks last year, which would drive revenue per available bedroom up 9.6 percent compared with the equivalent period last year.

Forecast and Analysis

According to weather.com at the time of this writing, the forecast for the long holiday weekend of Sept. 3-5, 2016, calls for a 10 percent chance of rain each day. However, weather.com is also currently predicting a 100 percent chance of rain on Friday, Sept. 2, due to Tropical Storm Hermine. Consequently, the Brittain Center predicts that average occupancy for its sample of HC-HC properties may be 60-65 percent for the night of Sept. 2, down 20-25 percent compared with the equivalent Friday of 2015. If the storm continues as currently forecasted, average occupancy may rebound to 80-85 percent on the nights of Sept. 3-4, within 5 occupancy points of the level of the equivalent weekend of 2015. Based on this week’s observations by Center researchers of 318 websites of VRPs available to rent in Horry and Georgetown counties, 74.3 percent are reserved for the week of Sept. 3-9, 2016. VRP reservations in Horry and Georgetown counties for that week are up 7.6 occupancy points or 11.4 percent compared with the same week of 2015.

Additional Research Notes

The Brittain Center’s preliminary sample of 28 HC-HC properties reporting for the week of Aug. 21-27, 2016, consisted of 13 hotels (all but five are oceanfront/view, and five are brand affiliated), 14 condo-hotels (all are oceanfront/view), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 9,483 units per week average.
