
Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of Oct. 2-8, 2016, indicates that the midweek occupancy rate averaged 34.5 percent, up 1.1 occupancy points or 3.3 percent compared to the equivalent week of 2015. During the Friday-Saturday night period, the occupancy rate averaged 13.2 percent, down 51.4 occupancy points or 79.6 percent compared to the equivalent weekend last year. The average daily rate (ADR) was down 2.3 percent during the midweek period and down 29.1 percent during the weekend compared with last year. Consequently, HC-HC occupancy for the week overall was down 13 occupancy points or 30.9 percent, and revenue per available room (RevPAR) was down 36.7 percent compared with the equivalent week of 2015. It should be noted that there was an evacuation order in force for flood Zone A of Horry and Georgetown counties from noon on Oct. 6 until 8 a.m. on Oct. 10, 2016, as a result of Hurricane Matthew.

VRPs

Based on the Brittain Center’s observations of random samples of internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (318 of the 3,135 units) for which complete data are publicly available, 66.4 percent were reserved or blocked from nightly rentals during the nights of Oct. 1-7, 2016. But again, considering the evacuation order for flood Zone A in Horry and Georgetown counties, researchers assume that VRP occupancy east of U.S. 17 was virtually nil during the time the evacuation order was in effect.

Six-Week Average Performance

Despite Hurricane Matthew, during the nights of Aug. 28-Oct. 8, 2016, 59.1 percent of the lodging properties in the Brittain Center’s voluntary sample of HC-HC properties located along the Grand Strand were occupied, which was still up 1.5 occupancy points or 2.6 percent compared with the equivalent weeks of 2015. The average daily rate for these properties was up 4.2 percent compared with the equivalent weeks last year, driving average RevPAR up 6.8 percent compared with the equivalent period last year.

Forecast and Analysis

According to weather.com at the time of this writing, the forecast for the weekend of Oct. 15-16, 2016, calls for 10 percent chance of precipitation on both days. Based on this week’s observations by Center researchers of 318 websites of VRPs available to rent in Horry and Georgetown counties, 53.7 percent are reserved for the week of Oct. 15-21, 2016. VRP reservations in Horry and Georgetown counties for that week are up 7 occupancy points or 14.9 percent compared with the same week of 2015.

Additional Research Notes

The Brittain Center’s preliminary sample of 19 HC-HC properties reporting for the week of Oct. 2-8, 2016, consisted of nine hotels (all but five are oceanfront/view, and five are brand affiliated), nine condo-hotels (all are oceanfront/view), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 8,248 units per week average.
