Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of April 15-21, 2018, indicate that the midweek occupancy rate averaged 47.5 percent, down 16 occupancy points or 25.2 percent compared to the equivalent week of 2017. During the Friday-Saturday night period, the occupancy rate averaged 74.9 percent, down 13.3 occupancy points or 15.1 percent compared to the equivalent weekend in 2017, which in that year included the Easter and Passover religious observances. The average daily rate (ADR) was down 21.7 percent during the midweek period and down 9.7 percent compared with the equivalent weekend period in 2017. Consequently, HC-HC occupancy for the week overall was down 15.5 occupancy points or 22 percent, and ADR was down 16.6 percent, bringing revenue per available room (RevPAR) down 34.9 percent compared with the equivalent week of 2017.

VRPs

Based on the Brittain Center’s observations of random samples of internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (318 of the 3,135 units) for which complete data are publicly available, 59 percent were reserved or blocked from rental during the week of April 14-20, 2018. The level of reservations was down 1.1 occupancy points or 1.8 percent compared with the equivalent week of 2017, which in that year included the Easter and Passover religious observances. For the nights of April 21-27, 2018, 56.1 percent of the VRPs were reserved or blocked from reservation. The level of reservations was down 6.4 occupancy points or 10.3 percent compared with the equivalent week in 2017.

Six-Week Average Performance

Preliminary results indicate that during the nights of March 11-April 21, 2018, 58 percent of the lodging properties in the Brittain Center’s voluntary sample of HC-HC properties located along the Grand Strand were occupied, which was down 6.4 occupancy points or 9.9 percent compared with the equivalent weeks of 2017. The average daily rate for these properties was down 0.9 percent compared with the equivalent weeks of 2017, leaving average RevPAR down 10.7 percent compared with the equivalent period of 2017. During the same period, 58.4 percent of the VRP bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from weekly rentals, down 1.1 occupancy points or 1.8 percent compared with the equivalent weeks in 2017. Average advertised price for this segment was down 6.6 percent, which would leave revenue per available bedroom down 8.3 percent compared with the equivalent weeks in 2017.

Forecast and Analysis

According to weather.com at the time of this writing, the forecast for the weekend of April 28-29, 2018, calls for a high temperature of 78 degrees and 72 degrees, and a 10 percent and 0 percent chance of precipitation, respectively. The Brittain Center predicts that average occupancy for its sample of HC-HC properties may be near 65 percent for the nights of April 27-28, 2018. Based on this week’s observations by Center researchers of 318 websites of VRPs available to rent in Horry and Georgetown counties, 49 percent are reserved for the week of April 28-May 4, 2018, even compared with the equivalent week of 2017.

Additional Research Notes

The Brittain Center’s preliminary sample of 23 HC-HC properties reporting for the week of April 15-21, 2018, consisted of 10 hotels (all but four are oceanfront/view, and three are brand affiliated), 12 condo-hotels (all are oceanfront/view), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 7,905 units per week average.
