The Tourism Economy Study: CCU Lodging Update, July 26, 2018

Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University’s voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of July 15-21, 2018, indicate that the midweek occupancy rate averaged 88.5 percent, up 3.7 occupancy points or 4.4 percent compared to the equivalent week of 2017. During the Friday-Saturday night period, the occupancy rate averaged 96.3 percent, up 5.3 occupancy points or 5.8 percent compared to the equivalent weekend in 2017. The average daily rate (ADR) was down 1.7 percent during the midweek period and down 1.2 percent compared to the equivalent weekend period in 2017. Consequently, HC-HC occupancy for the week overall was up 4.2 occupancy points or 4.8 percent, but ADR was down 1.5 percent, leaving revenue per available room (RevPAR) up 3.3 percent compared with the equivalent week of 2017.

VRPs

Based on the Brittain Center’s observations of random samples of internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (318 of the 3,135 units) for which complete data are publicly available, 88.9 percent were reserved or blocked from rental during the week of July 14-20, 2018. The level of reservations was down 4.5 occupancy points or 4.9 percent compared with the equivalent week of 2017. For the nights of July 21-27, 2018, 89.5 percent of the VRPs were reserved or blocked from reservation. The level of reservations was up 4.2 occupancy points or 4.9 percent compared with the equivalent week in 2017.

Six-Week Average Performance

Preliminary results indicate that during the nights of June 9-July 21, 2018, 88.8 percent of the lodging properties in the Brittain Center’s voluntary sample of HC-HC properties located along the Grand Strand were occupied, which was up 7.1 occupancy points or 8.6 percent compared with the equivalent weeks of 2017. The average daily rate for these properties was up 0.1 percent compared with the equivalent weeks of 2017, pushing average RevPAR up 8.7 percent compared with the equivalent period of 2017. During the same period, 84.6 percent of the VRP bedrooms in the Center’s random sample of Horry County VRPs were reserved or blocked from weekly rentals, down 2.4 occupancy points or 2.8 percent compared with the equivalent weeks in 2017. Average advertised price for this segment was up 5.4 percent, which would bring revenue per available bedroom up 2.5 percent compared with the equivalent weeks in 2017.

Forecast and Analysis

According to weather.com at the time of this writing, the forecast for the weekend of July 28-29, 2018, calls for a high temperature of 87 degrees and 86 degrees, respectively, and a 60 percent chance of precipitation on both days. The Brittain Center predicts that average occupancy for its sample of HC-HC properties may be above 90 percent for the nights of July 27-28, 2018. Based on this week’s observations by Center researchers of 318 websites of VRPs available to rent in Horry and Georgetown counties, 83.4 percent are reserved for the week of July 28-Aug. 3, 2018, down 4.6 occupancy points or 5.2 percent compared with the equivalent week of 2017.

Additional Research Notes

The Brittain Center’s preliminary sample of 21 HC-HC properties reporting for the week of July 15-21, 2018, consisted of nine hotels (all but four are oceanfront/view, and three are brand-affiliated), 11 condo-hotels (all are oceanfront/view), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 7,993 units per week average.
