# **Forecasts and Analysis**

The center's researchers are monitoring the percentage of VRPs blocked as reserved on the internet between Sept. 5, to Nov. 27, 2020 (above). The final results four days in advance of the date of arrival for each of the equivalent rental weeks in 2019 are also shown. Average occupancy and reservations results are available graphically at the center's <u>research website</u>.

According to weather.com at the time of this writing, the weather forecast for the weekend of Sept. 19-20, 2020, calls for a 20 percent chance of precipitation, and a high temperature of 71 degrees on both days. The Brittain Center now predicts that average occupancy for its sample of HC-HC properties may be near or above 80 percent for the weekend of Sept. 18-19, 2020.

### **August Results**
