Forecasts and Analysis

The center's researchers are monitoring the percentage of VRPs blocked as reserved on the internet between Nov. 7, 2020, and Jan. 29, 2021 (above). The final results four days in advance of the date of arrival for each of the equivalent rental weeks in 2019 are also shown. Average occupancy and reservations results are available graphically at the center's [research website](#).

According to weather.com at the time of this writing, the weather forecast for the weekend of Nov. 21-22, 2020, calls for 72 degrees and 70 degrees, and a 10 percent and 20 percent chance of precipitation, respectively. The Brittain Center now predicts that average occupancy for its sample of HC-HC properties may be near or above 40 percent for the weekend nights of Nov. 20-21, 2020.

October Results
