Understanding when my instructor is in person and cohorts the class

The instructor teaches in person during the scheduled day/time. The room cannot accommodate all students. The instructor divides the class into groups (cohorts). The cohorts participate in person on alternating days. When not in person, the cohorts participate online.

**Professor Locality:** In person.
**Student Locality:** Varies.
**Class Temporality:** The class is synchronous (all students participate live during the scheduled class time whether participating online or in person).
**Cohorting:** Students are in groups. Group configuration varies per class.

Some students have chosen to participate online.
